

A WHOLE NEW PERSPECTIVE FOR PERSONAL CARE AGENCIES

**What if you could deliver better home care services at a lower cost?
What if you could make your team happier, more productive, and
more efficient, with less travel time?**

The HomeSight system makes all of this possible by reimagining connected care using the technology seniors find most familiar.

Easy adoption:

89% of adults
over 56 use their TVs
5-7 hours per day

**Connected Care,
Made for TV**

CONNECT

Connect older adults with healthcare professionals, caregivers, family, and friends through their TV, creating simple, secure access to a network of trusted people who can contribute to their well-being and help them live independently longer.

ENGAGE

The HomeSight system features on-screen health and wellness reminders, the ability to share photos and videos with family and friends, and other ways to engage virtually with care professionals and communities.

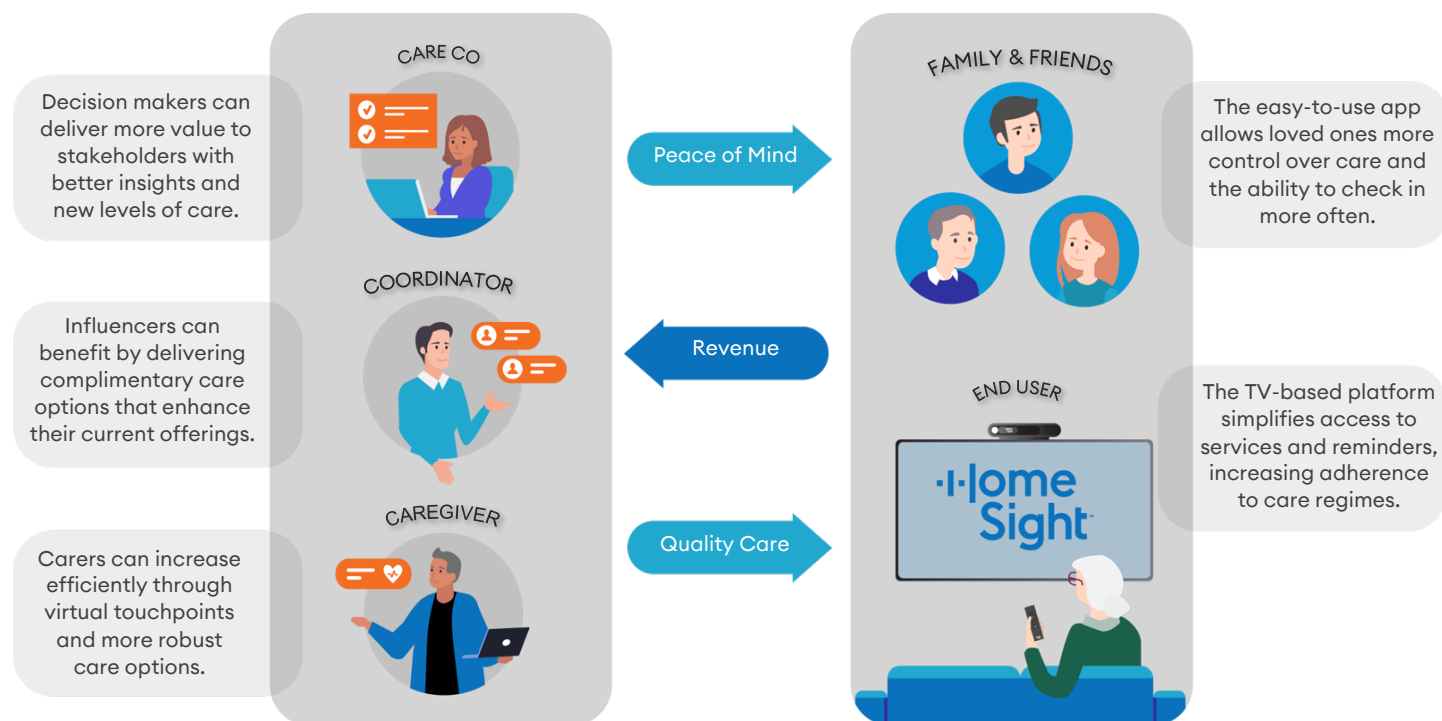

MONITOR

The HomeSight solution makes virtual lifestyle monitoring and healthcare delivery simple, efficient, and economical. It also captures actionable data that can be utilized to customize and improve care for those you serve.

Better home care, delivered more efficiently.

By easily engaging older adults through the familiarity of their TV, the HomeSight solution removes adoption barriers common to other connected care technology.

Find out how the HomeSight solution can enhance personal care for your business, your clients, and their loved ones.

Benefits for you

Agencies/franchises

- Open new revenue streams and B2B opportunities.
- Easy to deploy, understand, and administer.
- Improve staff attraction and retention.
- Rich health data analytics fuel further efficiency
- Improve brand differentiation

Caregivers

- Connect virtually with older adults at home.
- Offer wellness checks and other services remotely, reducing travel time.
- Automate certain tasks such as medication and appointment reminders.
- Attend to more individuals in the same amount of time – including multiple families.
- Increase job effectiveness and satisfaction.

Benefits for them

Older adults

- Easily stay connected with loved ones using a familiar technology.
- Receive more and better personal care.
- Improve health adherence with helpful reminders on the TV screen.
- Access engaging and enriching digital content.
- Maintain absolute privacy control.

Family and friends

- Perform wellness checks without having to travel to location.
- Get out-of-town friends and family more involved with the care of loved ones.
- Reduce out-of-pocket personal care expenses.
- Delay the expensive move to the nursing home.
